SAFE-T-STOP : For Cars and now Trucks

The IAME has been invited to bring along our members and their guests to this evening with a presentation of these innovative machines.

Not only is there a unit for use with Light Vehicles, this unit having been in existence for some time, although it has been vastly upgraded, there is now also a unit for use on Heavy Vehicles.

These units are not only for use in doing RMS "brake tests", they can give you so much more information for your customers, plus you can give the customer a "full printout" of their vehicles condition.

Both of these units will be setup and in operation during this evening, so this is your chance to come along and see them in action.

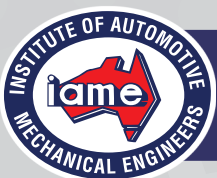

So, book early to reserve your place, and maybe bring along some of your team for this evening.

DATE Tuesday 17th April 2018

TIME 6.00pm SHARP

COST NOT APPLICABLE

LOCATION
SAFE-T-STOP Head Office
Unit 1, 44 Eddie Road
Minchinbury

Bookings Essential
