

## New Automotive Refrigerant Gas 1234YF

**Presenter: Jim Gerazounis from Cool Air**

You'll need to be ready with answers for your customer.

They may not even know their vehicle is an early adopter of a new refrigerant, which can lead to a lot of frustration and cost. When was the last time you checked the refrigerant used on a car you purchased?

Likely when R12 made way for R-134a decades ago.

To help your customer, explain the switch to 1234yf is an environmental issue, similar to the move from Freon (R12) to the most commonly used refrigerant today, R-134a.

**BOOKINGS ARE ESSENTIAL AND ASSISTS KEEPING ATTENDEES INFORMED OF ANY UNEXPECTED CHANGES.**

**COST NOT APPLICABLE**

**TIME 6:30pm for a 7:00pm start**

**DATE Tuesday 13th February, 2018**

**LOCATION**

Swann College, Primus Building,  
Level 3 /132 Franklin Street, Adelaide
